LOOKING FOR A BETTER DENTURE MATERIAL?...

DISCOVER JECTRON

We know how valuable your time is, doctor, and we know that you can't spend countless hours investigating *all* of the many different brands of denture resins. But it will be well worth your while to investigate JECTRON, the styrene denture resin. Jectron is an *entirely different* type of material. It is not an acrylic. It is a pre-cured styrene resin and is processed by an *entirely different* method, known as Trans-injection.

Jectron dentures never shrink, warp or water-swell. This positive form stability coupled with Jectron's remarkable conformity to tissues produces retention that is sealed-in—retention that lasts and lasts and lasts!

Discover for yourself Jectron's many outstanding advantages . . . advantages that will benefit your patients and eliminate chair-time normally required for tedious post-delivery adjustments.

When you prescribe Jectron, the dentures will be delivered to you in the exclusive Jectron Seal-Pack bag . . . your assurance of the finest in denture quality and craftsmanship.

A Professional Look at Profit

Profit isn't a word that need be "Taboo"!

Profit is the result of your time saved — and many patients pleased. Your chairtime is the most relentless robber of that schedule. Prosthetic cases must be cast to fit — not plier-fitted! Ticonium cases save chairtime because they **FIT** — look better — last longer.

Ticonium cases put the FIT into proFIT.

A Message to the Dental Profession:

Louis Wall

Max Wall

"The Standard Dental Laboratories have become our life work. We have enjoyed every minute of it—and we are truly grateful for the many wonderful friends we have made in the last quarter century. Not only because you have made our Laboratories a by-word in all corners of the world, nor because your patronage has contributed to our success—but because there can be no greater wealth—no greater reward than friendship. We extend to you the warmest greetings of our staff of more than 65, and our greatest desire to greet you in our new Laboratory, and sincerely hope that our relationship will continue for many years to come."

Lou and Max Wall

Oral Surgery for the General Practitioner

will be the subject at the

October Monthly Meeting of the Society

. . .

Our essayist will be

HENRY B. CLARK, Jr., M.D., D.D.S.

Professor and Chairman of the Department of Oral Surgery of the
University of Minnesota Dental School in Minneapolis

. . .

8:00 p.m. on October 15th, 1957

in PARLOR B of the WILLIFORD ROOM of the

CONRAD HILTON HOTEL

URGE DENTISTS TO RECEIVE FLU INOCULATION

The A.D.A. last week suggested that dentists and auxiliary personnel be considered for priority ratings for inoculation against Asian influenza. The suggestion was made to the Association of State and Territorial Health Officers at a special meeting called by Surgeon General Leroy E. Burney of the U.S. Public Health Service. In a telegram to Dr. Burney, Dr. Louis M. Cruttenden, of Chicago, assistant secretary of the A.D.A., said: "The American Dental Association requests that the State and Territorial Health Officers give consideration to establishing a proper priority for dentists and auxiliary dental personnel in the program of inoculations against Asian influenza in order that there be no unnecessary interference with the availability of dental care." In a resolution adopted by the State and Territorial Health Officers, it recommended that priority in vaccinations be given to (1) persons "whose services are necessary to maintain the health of the community"; (2) persons "whose services are necessary to maintain other basic community services," and (3) persons with tuberculosis and others who constitute a special medical risk. As members of a profession providing an essential health service, dentists are urged to receive the immunizing vaccine both to assure that dental care for the public can be uninterrupted and by example to encourage use of the vaccine among others that should be receiving protection. It has also been pointed out that dental societies can offer to lend their cooperation to local health authorities in helping to promote use of the vaccine among those groups considered especially to need the inoculations.

Merry Christmas and a Happy New Year

Nineteen hundred and fifty-seven years ago the Christ Child was born into a world of war, strife and turmoil. The radiance of His life has brought love, faith, and hope for a better world to millions. May his Divine Spirit bring peace to you and those dear to you at this Christmas time and hasten the day when peace will again be the order of the day.

We wish for you good health and prosperity in the coming year, and may the profession go forward to new and greater service to our fellow men.
